

Underwater Archaeologist Craft

All underwater Archaeologists are also SCUBA divers, so this little SCUBA diver is equipped with a clip board, which would hold his underwater writing materials to document the underwater site they are working on. These are usually shipwrecks but can also be places that were once above water.

Instructions:

1. Cut out all pieces from the template below.
2. The pieces are numbered into the order they are to be assembled using white glue.

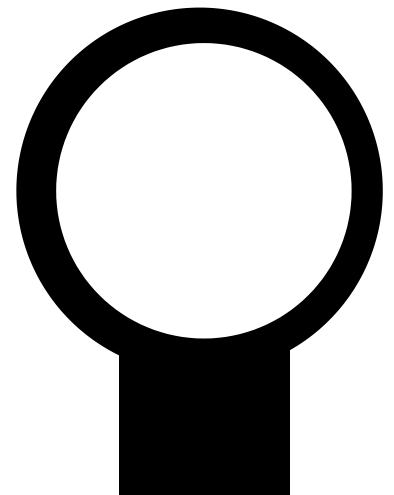

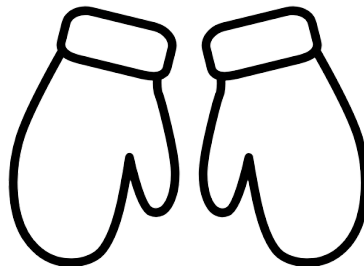

8: Flippers

7: Mask & breathing tube

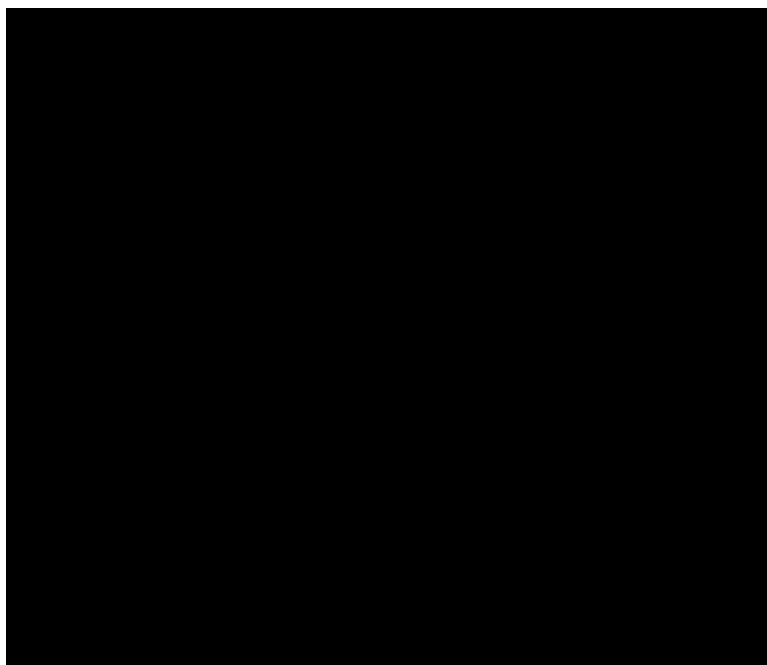

6: Hands

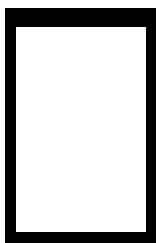

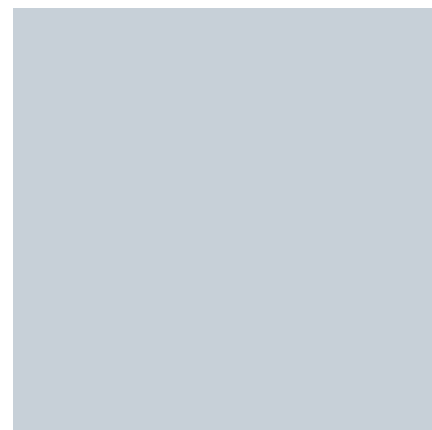

5: Head (colour the white space your own face -or take a photo and cut out your image to paste here)

1: Body

2: Oxygen tank

9: Clipboard

4: Arms

3: straps for Oxygen tank
