Characteristics of City/Region:

The Museum of Ontario Archaeology is located in the northwest corner of the City of London, the traditional territory of the Munsee-Delaware, Anishinaabe, Haudenosaunee Peoples and their Ancestors who have lived here from Time Immemorial. First named as a settler village by John Graves Simcoe in 1793, London has a rich and deep archaeological past, with evidence of human occupation from the period of glacial recession approximately 13,000 years ago, to the vibrant city that it is today. Adjacent to the Museum is a 500-year-old village once inhabited by approximately 2,000 Indigenous agriculturalists, today known as the Lawson Site. This site is considered one of the region's largest settlements before European contact.
